DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,4,5,6,8 are rejected under 35 U.S.C. 102(b) as being anticipated by the Japanese '563 publication. This publication shows a bucket with a jaw crusher and breaking teeth.

Claims 1-6,8 are rejected under 35 U.S.C. 102(b) as being anticipated by the Japanese '373 publication. This publication shows a bucket with a jaw crusher and breaking teeth.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over either of the Japanese publications noted above. The use of a toggle lever for increased control is well known in the jaw crusher art. In order to better control jaw crusher movement, it would have been obvious for one of ordinary skill in the art to modify either of the

Japanese publications by providing a toggle lever, since such a lever is well known in the art.
